◆ PUSH Dimming

- The PUSH control cabling should be <20m., mains rated and double insulated.
- Connect a wire from the Neutral supply to the Push-N terminal and connect a Live via the retractive (non-latching) switch to the Push terminal.
- On/Off = Short press of the PUSH switch.
- Dimming Up/Down = Long press of the PUSH switch.(1s-8s)
- The dimming direction reverses with each long press of the PUSH switch to enable fine tuning of the light level.
- When switched off and back on the light level will return to its current dimming level.
